Subject: Ride Hailing Integration Requirements

Dear Mr, Manyiri,

We spoke,
Kindly receive the integration requirements that need to be fulfilled with your platform before you can be licensed:

You need to prepare an API through which LATRA can get this information from your platform in a specified Date Range:

1. TripID
2. Origing Coordinates
3. End Coordinates
4. Start Time
5. End Time
- 6.Total Fare Amount
- 7.Trip Distance
8. Rating
9. Driver's Earning
10. Driver LicenseNo
11. Motor Vehicle Registration No

Together with this you need to link your system with our system for verifying licensed vehicles or drivers to be registered on your platform , you can also achieve the verification part through our mobile application.

NB: Our licensing department will test your system to prove its working as it should be before issuing you with the License.

Should you have any other queries, kindly do not hesitate to contact us.

Regards,

Eng. Eliud H. Kataraihya | Ag. Head | ICT & DM
Land Transport Regulatory Authority (LATRA)
